

We are seeking a Quality Analyst to become an integral part of our team! You will review, plan, communicate, and validate changes and design of software applications. The Quality Analyst will ensure the standards, procedures, and processes are used as it relates to functionality, usability, reliability, performance, and supportability of ABS software applications.

Responsibilities:

- Uses work flows and procedures that meet company's policies and expectations.
- Retrieves, uses, and stores data that meets the company's data compliance requirements.
- Uses standard testing scripts for all projects assigned.
- Works with others to identify problems and possible resolutions to meet release date.
- Identifies areas to improve and promote quality.
- Collaborates on alternate solutions to maximize product reliability and minimize costs.
- Collaborates with all departments in scheduling, prioritizing and solving situations.

Qualifications:

- Bachelor's degree in Information Technology and/or 0-3 years of experience in software application testing, consumer finance and/or banking industry, mortgage industry, dealer financing, or equivalent skills and experience preferred.
- Previous experience in software development, quality assurance, or other related fields
- Ability to take complex formulas and verify input/output. Ability to understand industry terminology related to loan origination calculations, servicing loans, and accounting with some guidance.
- Familiarity with relational databases such as MySQL and SQL Server
- Strong root-cause analysis skills
- Experience in General Ledger preferred
- Deadline and detail-oriented
